

Key knowledge

- I can describe some simple features of animals e.g. birds have wings, fish have fins and gills.

fins	shell	paws
tail	gills	wings
claws	fangs	fur

animals

- A **herbivore** only eats plants.

- A **carnivore** only eats other animals.

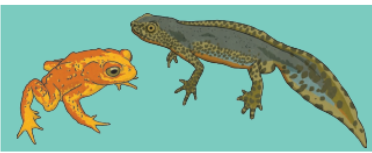

- An **omnivore** eats both plants and animals.
- Most humans are omnivores.

- I can classify animals into those that are **fish, reptiles, mammals, birds and amphibians**, and can explain how I know.

Mammals: warm-blooded, hair or fur, give birth to live young.

Amphibians: cold-blooded, moist skin, lay eggs.

Reptiles: cold-blooded, have scales, lay eggs.

Fish: cold-blooded, live in water, most lay eggs.

Birds: warm-blooded, have beaks, feathers and wings, lay eggs.
